Then, you verify your account. You can verify your account by phone, by selecting text or voice calls. Be sure to use the phone number you used to create your parent account. (Additional verification options vary depending on how my account was originally set.) After verifying your parent account, you can sign in to the Acellus parent interface. FREQUENTLY ASKED QUESTIONS Educators face the incredible challenge of reaching every student today, regardless of different levels of academic skills and often special needs and requirements. Acellus is designed to empower educators to connect with each student and meet their educational experience to meet their specific needs. Acellus courses are fine-tuned to make the learning experience accessible, while at the same time meeting state and national standards adapts to the skill set and level of the student, while maintaining rigedness and integrity. Acellus is interested in time often ordinary tasks that prevent teachers from spending their days teaching. Assignments and courses are automatically delivered to students according to the curriculum selected by the teacher. Exams, assessments and exams are automatically rated by Acellus – reports are generated automatically and are always accessible. Participation and time spent on the task are automatically marked and a report created for the teacher. Acellus gives teachers real-time reports and an incredible amount of data about every student in their class. Acellus keeps track of every day students log in to the system, the amount of time they spend on each task, and every answer they enter into the system. Using this data, teachers can only see very easily whether their students are struggling on a course or a concept, but they have all the data they need to help the student fill the gap in their knowledge so that they can make the student successful – turning their stuck students into successful students. Live Classroom Monitor is a tool that provides teachers with live updates on students' progress. The monitor shows the status of each student and is encoded by priority, such as a spotlight color. Green Active status shows that the student is progressing effectively. The SARI Extra Help Video status shows that Acellus is slowing down and giving additional instructions on the concept at hand. The RED Needs Help status shows that the student is stuck and needs help. By selecting a student, the teacher has access to a detailed report that shows the student's mastery of each concept presented. By selecting a concept, the teacher can view each response as well as acceptable answers and access the problem presented to the student. While all this data can be used by the teacher, Live Class Monitor helps determine who needs the most help from teachers, can research details and provide the right help and full time to the right student. Teachers can then re-apply to Live Classroom Monitor to see which student needs help the most at that moment. Acellus offers educators a wide suite of online courses from kindergarten to 12th grade, including mathematics, science, social studies, language arts and reading. Acellus also covers credit recovery, career and technical training, CollegeBoard Approved Advanced Placement programs, and elective courses. Acellus offers a general version of core classes and also offers courses for students with special needs a special educational monitoring, an honor piece for talented and advanced students, as well as a corrective selection of courses. Often students in the same class have such different learning requirements that it is almost impossible to teach at all levels. Acellus said that each student not only go at their own pace, but also has a suitable course. they're against it. Teachers have access to an entire suite of courses that allow each student to truly personalize their education. The Teacher Desk has an interactive display that provides up-to-date Acellus information until how many Assignment assignments are done, depending on the number of upcoming Events. It also gives teachers quick links to features like Live Class Monitor and GradeBook, providing the latest details about how their students are. The Acellus Classrooms tool allows teachers to get an overview of the progress and grades of students entering the Acellus Class. They can see which students have made extra progress and which students are left behind, each student's current grade and the subject they are working on. Student Reports provides several detailed data listings for teacher and parent analysis. Teachers can see exactly what concepts a student is struggling with, their grades and their continued class. Student data is easily accessible through Acellus Student Search. Teachers can select a letter to search by last name in the alphabet menu, or type a student's name in the search box to view a list of results. Acellus Gradebook stores an incredible amount of data and information about each student in each course. Whether your school provides daily, weekly or monthly grades, the Acellus Gradebook can handle this. When students work with individual Acellus Courses, their grades on teacher-controlled assignments are automatically updated. Teachers can also enter their own assignment grades and adjust the weight curve. Participation is kept automatically. When students start work, Acellus checks the clock and marks them as Present or Tardy. Teachers can manually log in to No School Days and Excused Days and view the class's attendance for the month. Private Lessons Acellus can be added to the Acellus course by teachers with the function of private lessons. Teachers can write assignments and grades and comments for student evaluation. Notes are seamlessly integrated into the Acellus Gradebook. The Class Setup tool provides a powerful entity for setting up classes. With a built-in search, students can be found by name or grade level. The Select All box allows all students in the search to be easily added to the classroom. The Acellus Library offers hundreds of additional educational materials, including early readers, classic books and videos. Students can always browse the acellus library for additional source material, almost like an educational version of YouTube. Home page » Support » Tutorials » You need to download the Acellus App to access your parent sign-in main account. After installing this, click Parent/Teacher Login. Open the GoldKey logon window Wait for it to open. Click Add Goldkey to This Computer. Enter the email address you used to register your student. Then, create a unique password and Account. You now need to verify your account. This account can be made using the phone number associated with (call/text). Be sure to use the phone number you used to register your student. (Available verification options may vary depending on how the original account was set.) Once you have confirmed your account, you can access your main account. Useful Tips: Don't close the GoldKey Sign-in window while you wait for your verification code. If you turn this off by mistake, you should be offended by the code. If there are multiple validation attempts, make sure you're using the latest code. Works.
